DR JOHAN IBRAHIM

Medical doctor with clinical trial monitoring experience. Progressed from Clinical Research Associate I to II at Aesculape Belgium-Singapore CRO (2019-October 2024), independently conducting site initiation, monitoring and close-out visits. Trial experience spans Phase III neurology and Phase IV aesthetics, including work in Singapore.

My background combines clinical practice, health research and clinic operations, with training in Good Clinical Practice, research design, medical statistics, data management and visualisation. Currently Clinic Manager at Klinik Inocare, Kuala Lumpur, leading operations, documentation, patient workflows and study-data coordination. Seeking a Senior CRA role focused on independent monitoring, cross-functional coordination, data quality and participant safety.

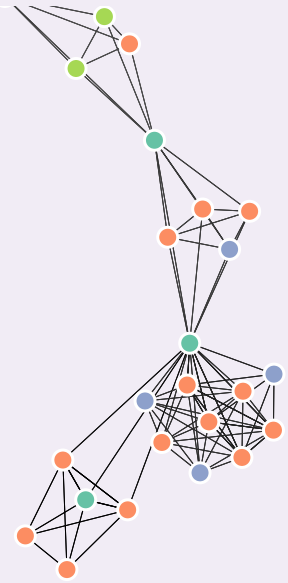

WORK EXPERIENCE

Present | Apr 2025

Clinic Manager

Klinik Inocare — Kuala Lumpur, MY

- Lead clinic operations following a management takeover, rebuilding workflows and coordinating wound care and regenerative therapy services.
- Establish operating procedures, clinical documentation practices and patient pathways, including appointments and follow-up.
- Manage staffing, suppliers, financial administration and day-to-day requirements for patient services.
- Translate clinic needs into software requirements for patient records, appointments, billing and inventory management in collaboration with the software developer.
- Provide feedback on the clinic management software and define requirements for automated patient follow-up.
- Define patient-data capture and export requirements with the developer to support planned exports of CDISC Analysis Data Model (ADaM) datasets for study analysis.
- Coordinate study-data collection and review completeness for an ongoing safety study of stem cell therapy in patients with knee osteoarthritis.

Oct 2024 | 2023

Clinical Research Associate II

Aesculape Belgium-Singapore CRO — Kuala Lumpur, MY

- Independently conducted site initiation, monitoring and close-out visits, maintaining oversight of site performance, study timelines and adherence to trial protocols. Monitoring responsibilities included a Phase III neurology trial and a Phase IV aesthetics trial in Singapore.
- Led the resolution of complex data discrepancies through site monitoring and clinical data review to support data integrity. Used data management tools to track study progress and monitor the recording, processing and reporting of clinical data against regulatory requirements.
- Provided guidance on regulatory requirements and changes relevant to trial conduct. Contributed to the development and review of study protocols, informed consent forms and other study documents to support compliance with applicable requirements.

2023 | 2019

Clinical Research Associate I

Aesculape Belgium-Singapore CRO — Kuala Lumpur, MY

- Supported the Clinical Project Manager and multidisciplinary Clinical Trial Team (CTT), working across medical writing, statistics, data management, monitoring partners, drug supply, regulatory affairs and safety. Helped coordinate study deliverables against agreed timelines, budgets, quality standards and operational procedures.
- Liaised directly with investigator sites, Clinical Research Associates (CRAs), CRO partners and vendors to support study set-up and ongoing conduct. Reviewed site performance, protocol deviations and ongoing study risks, and worked with the trial team to resolve issues in a timely manner.
- Collaborated with medical monitors, internal and external CRAs, data managers, statisticians and third-party study partners on ongoing medical and scientific data review. Supported the timely transfer and availability of high-quality study data, and coordinated analysis and interpretation for initial results.

2019 | 2018

Data Enumerator, MARS Project

SWRC, University of Malaya — Kuala Lumpur, MY

- Collected data for the MARS household survey, conducted by the Social Wellbeing Research Centre, University of Malaya, to examine ageing among adults aged 40 and above. The nationwide survey was designed to run every two years, targeting 9,000 eligible respondents.
- Conducted participant interviews and physical examinations in accordance with the MARS protocol.
- Maintained the accuracy of participant data recorded in the MARS database.

2013 | 2008

House Officer

HTAA, Ministry of Health Malaysia — Kuantan, MY

- Provided frontline inpatient and outpatient care during clinical rotations.
- Assisted with major orthopaedic operations, including five total knee replacements and five total hip replacements.
- Communicated with heads of department, consultants, medical officers and colleagues, and with patients and members of the public, to support clinical care across inpatient and outpatient settings.

EDUCATION

2018 | 2014

Postgraduate Diploma in Health Research

RCSI — Dublin, IE

- Trained in health research under the supervision of Prof Ronán M. Conroy, DSc, a medical statistician and contributing author to the SCORE project.

2008 | 2000

Medical Degree (M.D.)

Gadjah Mada University — Yogyakarta, ID

- Thesis: Effect of Cisplatin on Leydig Cells in Mice
- Recipient of the Gadjah Mada University Young Investigator Award, 2003-2004.

2000 | 1999

Matriculation Programme

UNIMAS — Penang, MY
